

ENDAVA INTERNSHIP PROGRAMME | SPRING 2026

STUDY MATERIALS FOR JAVA AUTOMATION QA ENGINEER

An **Automation QA Engineer** is a specialist whose responsibilities focused to improve the software development process by detecting errors in a product, so that requirements and goals for a software will be fulfilled and preventing defects from occurring again.

The candidate should be strong in:

- Basic understanding elementary testing concepts: (bug, test cases, testing types and levels.)
- Elementary database knowledge
- Experience in programming language Java
- Analytical and logical thinking
- Good English (A2+)

Typical tasks of the QA specialists are checking if the product complies with the requirements, assessing risks, planning tests, analyzing the test results, and ensuring a good customer experience.

To be better equipped for the qualifying test and interview, we encourage you to examine the **studying materials**, recommended for **Automation Testing** internship:

- Reading **ISTQB foundation level** syllabus (CTFL Syllabus 2023 v4.0 document), exploring in Google the unknown concepts: [available here](#)

NOTE: A very good knowledge of chapters 1 to 4 is a **must**.

- Reading and understanding the **SCRUM guide**:
